veneer) to quartz tiles in
chiseled or sculptured finish,
flagstone and bluestone for
paving and cladding**

**For the classic
and enduring
look of natural
stone, norstone
has a range of
products to suit**

(1) • Chic and contemporary
Charcoal rock panels ideally suited
for designer applications

(2) • This striking feature wall in
White rock panels combined with a
clever sliding picture to hide the TV

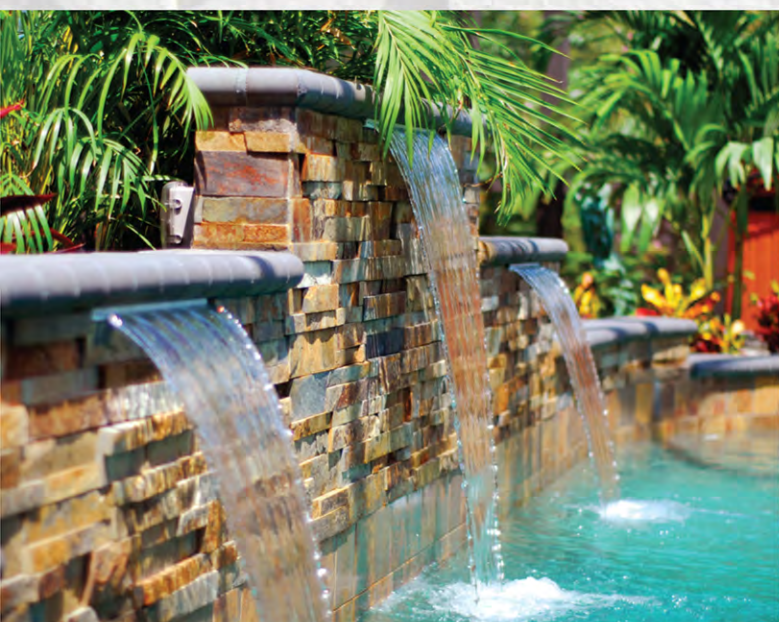

(3) • Stunning outdoor feature
wall with fireplace clad in
Ivory rock panels

(4) • Easy and quick to install,
Ochre rock panel corners are
the perfect solution to create
impressive columns

Ochre rock panels create the consummate ambiance for this heritage concert hall.

Salt attack resistant and 3 dimensional, rock panels are ideal for forming a functional and attractive water feature.

Because Norstone products are medium-weight stone veneer cladding, they can be installed quickly without the need for expensive foundations.

The benefits of investing in Norstone stacked stone rock panels for wall cladding include:

- Quick and easy to install, significantly reducing on site costs
- Distinctive and versatile; perfect for renovation or new construction
- No expensive footings required, can go below soil level
- Increased thermal and noise insulation
- Maintenance free and very durable
- Corners available in all colors as finger joint interlocking pairs that are handmade and unique in their appearance

Appealing White rock panels exclusive to Norstone look stunning in this residence.

Natural Stone:

A Green Building Product

Norstone believes in creating and producing products that fit with the environment and the community.

Natural stone is perfectly suited for green building because it has an enduring life cycle, free of impurities and helps protect the environment.

Norstone products have lower VOC emissions than man-made products, leading to better air quality.

Being natural, durable and low maintenance means minimal energy costs when compared to imitation man-made products. Natural stone is far superior in life cycle cost and preserving the environment

5 reasons for selecting natural stone

- an aesthetically appealing product with enduring elegance and allure
- will enhance its surroundings with its warmth, texture and beauty
- an ecological and durable building material which is ideal for paving, flooring and cladding
- a three dimensional product that offers design flexibility in application and functionality
- a versatile product equally suited for classic or contemporary architecture

This fireplace façade is highlighted using Ochre rock panels. Their clean and classic lines create the stunning centerpiece of this room.

Salt attack resistant and 3 dimensional, Charcoal rock panels are ideal for this eye catching feature wall

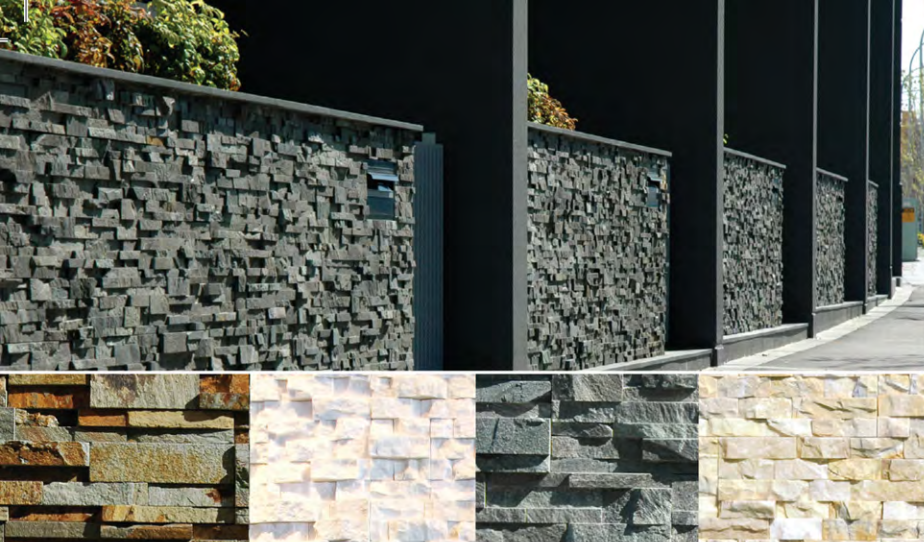

These designer accessories are ideally complemented by White rock panels in this hotel lobby.

Norstone is a natural stone supplier based in South East Asia with an international reputation for producing high quality natural stone products. While committed to providing exceptional personalised service to our customers/clientele, we create products with a high degree of integrity that are enduring, authentic and appropriately suited for our customers and the environment. We are committed to the respect of human rights and the environment in every aspect of our business.

Since inception, Norstone has adhered strongly to our core principles of selecting the highest quality raw material that nature has produced, enhancing its natural properties with innovative designs that provide unique and flexible design possibilities and décor solutions for our customers. With this commitment, Norstone is becoming an internationally recognized brand for quality, innovation and service in natural stone products for veneer, tiles or paving.

Curved walls can be easily formed with Ochre rock panels to create a spectacular staircase in this luxury home.

Rock Panels

Hand-made from select pieces of cut stone, each panel is unique in color and design, creating the appealing 3-dimensional look of stacked stone veneer.

- Size: 24" W x 6" H x 3/4" to 1 1/2" thick
- Av Weight: 12 lbs per panel (1 sq ft)
- Qty: 4 panels (4 sq ft) per box. 192 sq ft per crate

Currently available in 4 colors: Charcoal, Ochre, White, Ivory

Rock Panel Corners

Hand-crafted from select pieces of cut stone and skillfully formed as finger joint interlocking sets that are unique and impressive in their appearance. The corners are simple and easy to install, significantly reducing on site labor costs.

- Size: 16" x 8" x 6" H x 3/4 to 1 1/2" thick
- Av Weight: 11 lbs per set
- Qty: 4 corner sets per box. 192 sets per crate

Currently available in all 4 colors: Charcoal, Ochre, White, Ivory

XLX Rock Panels

Comprised of select pieces of stone which are larger than those of our standard Rock Panel series, the XLX Rock Panel is well suited for projects that require a larger scale of stone but with that same signature Norstone look.

- Size: 24" W x 6" H H x 3/4" to 1 1/2" thick
- Av Weight: 12 lbs per panel (approx 1 sq ft)
- Qty: 4 panels per box. 192 panels per crate

Currently available in 2 colors: Charcoal, Ochre

XLX Rock Panel Corners

Skillfully formed as finger joint interlocking sets, XLX Rock Panel Corners are the perfect corner companion for the XLX Rock Panels. Simple and easy to install, these corners significantly reduce on site labor costs.

- Size: 16" x 8" x 6" H x 3/4 to 1 1/2" thick
- Av Weight: 11lbs per set
- Qty: 4 corner sets per box, 192 sets per crate

Currently available in 2 colors: Charcoal, Ochre

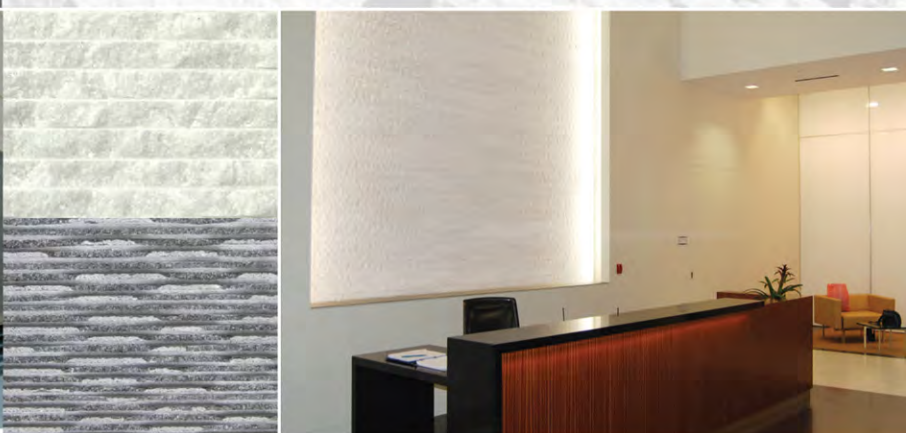

Basalt Interlocking Tiles

Distinctive and durable, Basalt Interlocking Tiles provide a linear, sleek and modern wall covering option. A mesh mounted tile unit formed in a random pattern from 9 strips of Basalt stone covering 1.3 sq ft.

- Size: 12" W x 2.4"/1.4"/1" H .5" thick
- Weight: 8lbs per tile unit

Currently available in 2 colors: Grey, Ebony
