# ABOUT NORSTONE

Since its inception in 2003, Norstone® has developed to become a market leader in architectural grade natural stone veneers. The company is recognized throughout the world for its subtle blend of design, elegance, functionality, and outstanding quality in its stone veneer products, which have been used in the building industry for more than a decade.

Founded and head quartered in Sydney, Australia, Norstone® products are exported worldwide to a carefully selected team of distributors who share a unified vision of bringing innovative natural stone products to the global marketplace in an environmentally responsible way.

At Norstone®, the entire manufacturing process of our products, from quarry to finished product, is managed directly at our modern production facility in South East Asia. This allows us to monitor the extraction process, maintain regular supply and ensure that the colors and texture of our products remain unique and exclusive to our brand.

## OUR PRODUCTS

Our stone veneers are 100% natural, simple, lightweight and cost effective. Designed with highly efficient installation characteristics, they are the ideal solution in the industry for any residential or commercial wall cladding project. As is consistent with our vision, Norstone® products are also environmentally friendly, inert and fully recyclable as well as energy efficient in production and handling.

Due specifically to their internal design, our Panel Collections are distinguished by remarkable rigidity and structural strength while also being lightweight. We take pride in making products that are extremely durable, easy to maintain, and which will not fade or change over time.

# ROCK PANELS

## STACKED STONE MADE SIMPLE

Norstone® Rock Panels are a hand-made stone veneer wall panel system, offering ease of installation and unique alternatives for any vertical applications, interior or exterior.

The living colors and textures of our natural stone gives architectural projects a beautiful and impressive finish. Norstone® Rock Panels are handmade from select pieces of cut natural quartz or sedimentary rock that ensure each one has a unique colour and design.

# XL ROCK PANELS

## SUPER-SIZE YOUR STONE VENEER

Where a larger format stone is desired, our XL Collection delivers superbly. With larger and fewer individual stone strips per panel, and a unique interlocking end system, XL Rock Panels offer a bolder look, while still leveraging the same great corner and installation concepts as our Rock Panels Collection. With its larger individual stone sizes, the XL series is the perfect compliment to larger wall applications.

# BASALT IL TILES

## VOLCANICALLY INSPIRED DESIGN

Basalt Interlocking Tiles are a powerful combination of design, technology, and extraordinary stone. Large slabs of cooled basaltic lava rock are cut and honed into individual strips, which are then mesh mounted, creating a smooth, contemporary cladding system. Smooth and silky to the touch, the natural honed finish of our Basalt IL Tile is refined and luxurious, and an ideal selection for interior and exterior wall surfaces.

### The Unit Dimensions

**Total:** 17" (w) x 15" (h) // **Pc:** 12" (w) x 1", 1.2", 1.4" (h)

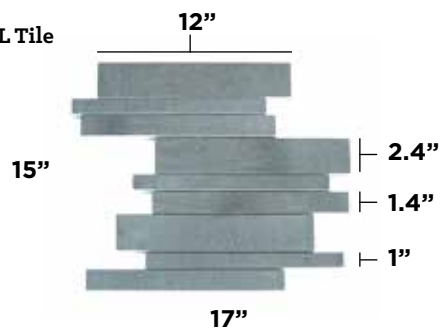

**Thickness:** 0.4" - 0.6" thick

**Coverage:** 1.3 sq ft / panel

### Weight

7 lbs / unit

# BASALT 3D PANELS

## EXTRAORDINARY STONE, EXTRAORDINARY SYSTEM

Designed in modular 6" x 24" panels with highly calibrated interlocking ends to eliminate vertical seams, our Basalt 3D Panels are not just beautiful, they're also highly functional. Utilizing honed Basalt as their medium of choice, they are incredibly smooth to the touch yet remarkably durable, making them ideal for exterior as well as interior applications.

For designers, Basalt 3D offers a new way of creating walls with a linear, dimensional perspective using natural stone as their finish. Leveraging our industry leading finger-joint corner system, these modern and refined panels will ensure every wall is complete, down to the last detail.

### The Unit Dimensions

**Flat Panel:** 24"(w) x 6"(h) x 0.5"-0.625" thick

**Corner & Natural End:** 16"/8"(w) x 6" (h) x 0.5"-0.625" thick

# HASSLE FREE INSTALLATION

## **A LIGHT-WEIGHT, ALL-NATURAL STONE SYSTEM THAT INSTALLS LIKE TILE**

All Norstone products are designed to be easily installed over cementitious surfaces like cement board, brick or block using a tile thinset without the need for clips or brackets like traditional stone masonry. All of the products are highly calibrated allowing for simple & fast installation.

## **TRY THE MOST SEAMLESS INTERLOCKING/FINGER-JOINT CORNER IN THE WORLD**

Where other corner systems are basic, thin, or altogether nonexistent, our complex design of inter-woven fingers deliver the most seamless look possible so your finished installation looks and feels as if a stone mason spent a lifetime perfecting it.

## **THE BEST RESOURCES FOR THE BEST PROJECTS**

A full range of product knowledge awaits in our technical library, including detailed standard and CSI specification sheets, installation guides, product testing results, material recommendations and much, much more. We are keenly aware of our clients requirements and won't stop till they are met.

# EXPERIENCE THE NORSTONE DIFFERENCE

## **SMART STONE PRODUCTS. TRUSTED BY ARCHITECTS FOR OVER 10 YEARS**

At Norstone we pride ourselves on taking an old medium like stone and making smart products with it. Whether it's one of our Stone Panel Systems or our Slim Line Basalt Collection, our products are designed to be packaged and transported efficiently, installed with simplicity, improve upon similar products, and last for lifetimes. We go the extra mile with our panel system's line of outside corner units, taking out the drudgery of working with natural stone on corners and columns which yields a superior result to other products and techniques.

At Norstone, we're constantly thinking outside the box to make products that people want, and make those products better than anyone else.
